HWH SDS NEO SCREWS

Self-drilling screws are manufactured for use in wood, fiberglass and metal. They possess a drill point which enables the screw to drill its own hole in thin gauge steel. The sharp threads create their own mating thread when drilled into the material, and provide a stronger grip to your surface.

Designed for power driving wood or metal-to-metal.

Steel-backed neoprene washer creates a watertight seal.

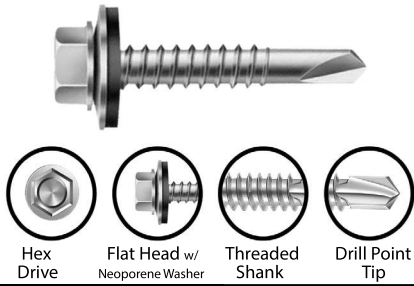

Carbon Steel plating offers moderate protection against rust and corrosion

- ✓ *Self drilling*
- ✓ *No pre-drilling required*
- ✓ *Multi-material function*
- ✓ *Corrosion resistance*

HWH (Hex Drive)

BEST BUILD HWH SDS NEO SCREWS

POINT: Drill Point Tip
DRIVER: Hex Drive
HEAD: Flat Head w/t Neoporene Washer
COATING: Carbon Steel
APPLICATION: Wood | Metal
