

BEST BUILD

LATHE WOOD SCREWS

Phillips Drive

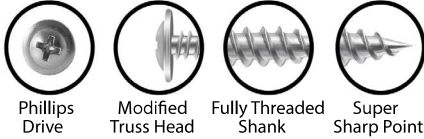

Best Build Lathe Wood Screws are self-drilling screws, which have higher density, better stability, durability, corrosion resistance, and wear resistance than ordinary screws.

Hydrogen treatment makes the material less prone to cracking during use and can be better fastened. Easy and fast installation. No pre-drilling required.

Ensures superior holding power in wood connections, delivering a secure fit for demanding applications.

- ✓ *Self drilling*
- ✓ *Less prone to cracking*
- ✓ *Superior holding power in wood connections*
- ✓ *Corrosion resistance*

BEST BUILD LATHE WOOD SCREWS

POINT: Super Sharp Point
DRIVER: Phillips Drive
HEAD: Modified Truss Head
COATING: Carbon Steel
APPLICATION: Wood
