

FAST CEM CONCRETE SCREWS

Hex Head

Fast Cem Concrete Screws are a self tapping anchor for light to medium duty applications in concrete, masonry block, brick, and wood base materials.

Works like a screw acts like an anchor – quick and easy to install.

The sharp point and hi-lo threads aids in fastening into pre-drilled holes as the threads tap securely into concrete.

Also known as concrete tappers or “blue screws”, our FastCem screws are finished in a 1,000 HR Blue Ruspert coating or Stainless Steel for extended durability and corrosion protection.

- ✓ ***Self tapping anchor***
- ✓ ***Quick and easy installation***
- ✓ ***Holds securely into concrete***
- ✓ ***Extended durability and corrosion protection***
