

FAST FIBER

PLYCEM SCREWS

Ribbed Bugle Head-
ensures positive
counter sinking

**Mult Height-
Threaded Shank**

Spoon Point

Fast Fiber is a specially made Cement board screw with ribs under head which allows for perfect countersinking. The spoon point penetrates boards easily and quickly with high pull-out resistance and minimal board damage.

1,000 Hour Ruspert Coating provides superior protection from corrosion, even in coastal environments.

Designed to work with all fiber cement boards like Plycem®.

Material Application: Attaches cement board to wood or light gauge metal studs.

- ✓ ***Easy and clean countersinking***
- ✓ ***Spoon Point for quick penetration***
- ✓ ***Grey Ruspert 1000 hours***
- ✓ ***Designed for Cement Boards to wood or light gauge metal***
