

## FAST FRAME | FAST FINISH

### DRYWALL SCREWS

**Command Cap-**  
with reverse  
threading ensures  
countersunk  
everytime

**Helli Thread-**  
faster setting

**V Tip-**  
for super fast  
penetration

Fast Frame and Fast Finish special thread and point design gives superior performance, fast and quick penetration. The unique design allows for a speedy installation process and outperforms regular fine thread drywall screw by average half second per screw (time savings when comparing our #6 x 1 1/4" screws with competitors of the same size).

Our tests have shown that the Fast Frame and Fast Finish screws' penetration performance is not only fast but also stable and reliable. Less screw failure means more production.

Can be used on a wide range of materials such as gypsum board, wood, fiberboard and light gauge steel (max. thickness 1.6mm).

43% increased penetration speed  
60% increased installation speed  
Save 30 minutes job time daily

- ✓ **Compatible with a wide range of drywall applications**
- ✓ **Allows fast and efficient installation with added stability**
- ✓ **Provides a secure hold that resists loosening over time**
- ✓ **A cost-effective choice for budget-conscious projects**
